

IRROMETER®

1 Large Filler Cap makes servicing easy.

Compare the IRROMETER with any other tensiometer and you'll agree that for quality backed up by service the IRROMETER gives you the greatest return on your investment.

2 Reservoir holds reserve supply of water, reduces servicing.

3 Submerged valve cannot trap air, increases sensitivity.

4 Plastic construction eliminates leaks. No metal to cause heat expansion problems.

5 Patented closure design. Prevents strain and compression on gauge.

Plastic used in construction is impervious to corrosion, electrolysis or attack by soil or agricultural chemicals.

7 Patented sealed gauge prevents corrosion of gauge movement and keeps out dust, moisture and agricultural chemicals. Ensures long gauge life.

8 Ceramic tips resist breakage yet give quick response to soil moisture variations.

9 Water seal keeps gauge air free, assures sensitive gauge action.

10 Straight tube construction makes installation easy. Removal simple. Pulls out of soil without digging. Ceramic tip will not pull off when removing instrument from ground.

WHY IRROMETER IS THE FINEST

11

Tip connection guaranteed for life. All else guaranteed for one year against defects in workmanship or materials.

12

IRROMETERS are **dependably accurate**. The finest in soil moisture measurement since 1951.

Model "SR", with threaded tip for easy replacement.

13

Special **Model "LT"** is designed for the ultimate in low tension measuring — i.e. below 25 centibars.

14

15

Miniature Low Tension, **Model "MLT"**, for use in small containers.

16

Model "S", with exchangeable extension tips to easily change length.

Optional automatic switching versions available to control irrigation.

17

18

Also available with electronic output for **automatic data collection**.

19

IRROMETER's **wide variety** of instrument types available in **many lengths**.

20

Global distribution ensures **easy availability**.
